Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is in response to applicant's communication of 9/13/2006.

Currently claims 1-6 and 22-27 are pending. Prosecution is reopened.

Allowable Subject Matter

Claims 1-6 are allowed. In light of the applicant's arguments in communication 9/13/2006 and reconsideration of the prior art of record claims 1-6 are allowable.

The following is an examiner's statement of reasons for allowance: The prior art of record alone or in combination fail to teach the following.

A latch member extending from the neck member in a direction towards center of the collar, latch member coacting with the shoulder of the hub and the distal end of the collar and coacting with the base of the hub to prevent the collar from being removed from a vial once the collar has been mated to the vial and the distal end of the collar is positioned adjacent to the hub.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments with respect to claims 22-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 22-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Mumford (U.S. Patent Number 6,575,941). Mumford discloses a safety device (as in figures 8 and 9) comprising a collar (lower portion of element 2 or 40), a neck (middle portion of element 2) extending from collar, a housing (6) pivotable connected to neck, a

latch member (upper portion of element 2) integrated to neck and flexible relative to collar, wherein when said collar is placed about a vial (as in figure 1b) and moved toward hub (110) of said vial (114) said latch member is latched onto another end of the hub (as in figure 1B). Further Mumford teaches integral hooks on the housing (50 in in figure 10a) for lockingly gripping.

Claims 22 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Olliffe (U.S. Patent Number 5,135,509). Olliffe discloses a safety device (as in figures 8c) comprising a collar (lower portion of element 8 surrounds hub), a neck (middle portion extending from element 8) extending from collar, a housing (7) pivotable connected to neck, a latch member (upper portion of element 8, below hub 25) integrated to neck and flexible relative to collar, wherein device is fully capable of the function of when said collar is placed about a vial and moved toward hub (toward bottom of figure 8c) said latch member is latched onto another end of the hub.
